

A black and white photograph capturing a moment of joy and activity in a park. In the foreground, the back of a person's head and shoulders is visible, looking towards the center. In the middle ground, two men are engaged in a game of frisbee. One man, wearing a light-colored t-shirt and trousers, is in a dynamic pose, reaching out with his hands towards the other man. The second man, wearing a horizontally striped t-shirt and jeans, is smiling broadly and holding a frisbee high in the air with his right hand. The background is filled with lush trees and a bright sky, suggesting a sunny day. The overall mood is energetic and carefree.

Genium

Genium ist der technologische Fortschritt in der Entwicklung von mikroprozessor-geregelten Kniegelenken, der es den Anwendern ermöglicht, sich so naturgetreu und vielfältig zu bewegen wie nie zuvor.

Funktionen und Vorteile:

- Optimized Physiological Gait (OPG)
- Natürliches Treppensteigen und Überwinden von Hindernissen
- Natürliches Stehen
- Leichtes Laden durch induktive Ladung
- Nutzungsdauer bis zu 5 Tage
- 5 MyModes, von Anwender selbst einstellbare, individuelle Aktivitätsmodi

The Genium is the technology breakthrough in the development of MPcontrolled knee joints, allowing users to move more naturally and with greater versatility than ever before.

Functions and Benefits:

- Optimized Physiological Gait (OPG)
- Stairs and Obstacles function
- Intuitive Stance function
- Simple inductive charging
- Use up to 5 days
- 5 MyModes for individual programming of special movement pattern
